HR Policy Assistant

Name: Manav Rath

Roll No: 23051679

Batch/Program: 2023-2027

Problem Statement

Employees frequently ask repetitive HR-related queries such as leave policies, working hours, and company rules. This increases the workload on HR teams and delays response time.

Solution

This project is an AI-powered HR assistant that answers employee queries using company policy documents. It uses Retrieval-Augmented Generation (RAG) to provide accurate and context-based responses.

Features

• HR query answering
• Context-based responses (no hallucination)
• Fast response using Groq LLM
• User-friendly Streamlit UI
• Conversation memory
• Dynamic PDF upload and automated document ingestion

Tech Stack

• Python
• ChromaDB
• Sentence Transformers
• Groq LLM
• Streamlit

Working Explanation

1. User uploads PDF document
2. System extracts text from PDF
3. Text is split into smaller chunks
4. Chunks are converted into embeddings
5. Stored in ChromaDB for retrieval
6. User query retrieves relevant chunks
7. LLM generates answer based on context

CONTROLS
The Leave Policy of our company states that employees are entitled to 20 paid leaves per year, including casual and sick leave.
Casual leave must be applied at least one day in advance.
Sick leave can be taken without prior approval but must be informed to the manager.
Unused leaves can be carried forward up to 10 days to the next year.
If you have any specific questions regarding this policy, please let me know and I'll be happy to assist you.

what about benefits?
I don't have enough information in the HR policy to answer that regarding benefits. However, I can suggest that you may want to refer to other company policies or documents such as Health Insurance, Provident Fund, or Employee Benefits Policy for more information on benefits.

Unique Points

• Avoids hallucination by grounding responses in retrieved context
• Supports dynamic document ingestion
• Real-time query answering system
• Scalable architecture

Future Improvements

• Voice-based assistant
• Integration with enterprise systems
• Multi-language support
• Advanced analytics dashboard
